

IMVU Advertising Banner Instructions

All our flash products load in an XML file that tells the widget what to display. It's easier than it looks so don't be afraid to try it out. If you have any questions please contact us at support@devcredits.com.

The banner widget is unique in that it can only contain links to links within the IMVU world. Links can be made to any link that begins with <http://www.imvu.com/> You can have one or as many links as you would like and one or as many dropdown menus as you would like.

Step 1: Open the XML file in notepad to edit it; below you will find the options and what you can change.

XML File:

```
<?xml version="1.0" encoding="iso-8859-1"?>
<nav>
<graphic>menu.jpg</graphic> - Graphic to the left of the menu. (MUST BE AT LEAST 45 PIXELS WIDE)
<menux>46</menux> - Distance setting for the left edge of the dropdowns in pixels
<menuy>8</menuy> - Distance setting for the top of the dropdowns in pixels
<menu name="Sample Menu" color="0xFF0000"> - Dropdowns are created by adding new <menu> xxxxx </menu>'s
  <item name="Room Link" color="0xFFFFFFFF" type="link" data="rooms/?search_terms=devcredits"></item>
  <item name="Group Link" color="0xFFFFFFFF" type="link" data="groups/group/DevCredits"></item>
  <item name="Peer Review Link" color="0xFFFFFFFF" type="link" data="peer_review/"></item>
  <item name="Developer Reports" color="0xFFFFFFFF" type="link" data="catalog/developer_report.php"></item>
  <item name="Creator Center" color="0xFFFFFFFF" type="link" data="creators/education_center.php"></item>
</menu>
</nav>
```

DO NOT INCLUDE <http://www.imvu.com/>

Discard this Part → http://www.imvu.com/catalog/web_mypage.php?user=23193727 Copy This Part To Item

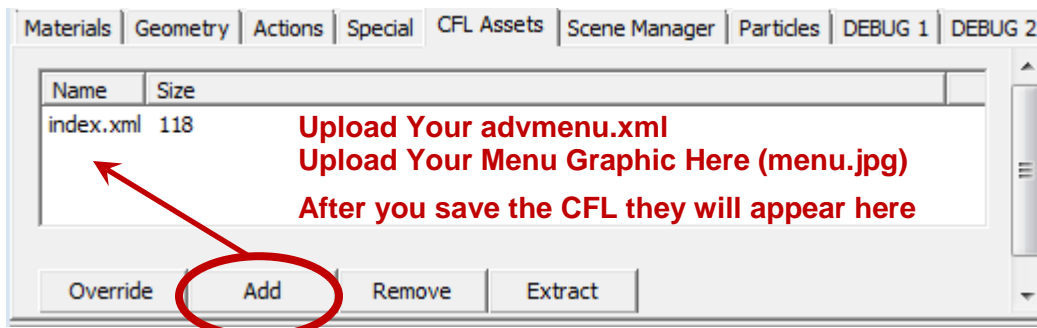

```
<item name="DevCredits HP" color="0xFFFFFFFF" type="link" data="catalog/web_mypage.php?user=23193727"></item>
```

Step 2: Upload the file to the CFL Assets Tab.

Once you have your edits save your advmenu.xml file and upload it on the CFL Assets tab to replace the xml file that is there, check spelling and capitalization.

Graphics: Your menu graphic can be as large as you want it to be - adjust the menux and menuy settings for where you want the dropdowns to begin. The Graphic you Upload **MUST** match the Filename (<graphic>menu.jpg</graphic>) used in the XML file. PNG's, JPG's, or BMP's may be used for the menu graphic.

CFL ASSETS TAB - *****XML MUST BE NAMED advmenu.xml*****

NOTE: - You will not see these files when you derive but using the Add button WILL replace them

NOTE: - The Menu Dropdowns will not show up in Preveiw, Flash isn't supported in Preveiw. You will need to test the dropdowns in Client.

NOTE: - Dragging your XML into Internet Explorer can help Diagnose Problems with your file.
